

● GUIDE 01 OF 04

Faceless Account Setup

Set up your AI creator account the right way from day one, so it looks like a real creator in your niche before you ever post.

1 Pick your niche

- This kit is built around **beauty**. Go narrow inside it: "**skincare for women over 35**" beats "beauty." Narrow niches get found faster.
- Save 10 creators in your niche who are doing well. They're your blueprint.

2 Build your AI creator persona

Write this down and never change it. Viewers follow a person, not a random face. Or let the **Universal Master Prompt** in this kit create her for you.

Name

A believable first name that fits your viewer.

Age and look

Face, hair, skin, build, and personal style.

Personality

Calm and honest, high-energy, funny, or straight-talking.

Backstory

Why they care about this niche. One or two sentences.

3 Create the account

- Use a fresh email for each account.
- **Username:** simple and easy to say out loud. Persona name plus niche works well, like **sarah.skincare**.
- Switch to a **creator or business account** so you can see your analytics from the first post.

4 Set up the profile

Profile picture

A clear, natural-looking photo of your AI creator. Face centered, shoulders up, soft natural light. Use the character reference image from the Master Prompt.

Bio formula

Who you are + what you post + why follow. Keep it under 80 characters.

EXAMPLE

Dana, 38. Glass skin after 35. Simple routines, honest picks.

Link

Leave it empty for now. Add it after warm-up. Follow the Account Warm-Up Checklist next.

Built your avatar. Now how does it make money?

Amazon pays as little as 1% to 3% in health and beauty. Creator OS members create for our in-house brand and earn 100% commission, only when we work together.

• CHECKLIST 02 OF 04

3-Day Warm-Up Checklist

New accounts that start posting on day one often get limited reach. Warm the account up for 3 days first so the platform sees a real person. Check each box as you go.

Day 1: Act like a normal user

NO POSTING

- ☐ Scroll your niche for 20 to 30 minutes
- ☐ Like, comment on, and save posts from creators in your niche
- ☐ Follow 10 accounts in your niche. That's it, only on day 1.
- ☐ Do not post yet

Day 2: Same warm-up + finish the profile

NO POSTING

- ☐ Scroll your niche for 20 to 30 minutes
- ☐ Like, comment on, and save posts from creators in your niche
- ☐ Finish the profile: profile picture, name, and bio all filled in
- ☐ Do not post yet

Day 3: Start posting

GO TIME

- ☐ Post **3 videos a day**, spread out across the day
- ☐ Keep engaging in your niche before and after you post
- ☐ Reply to every comment

Every day after

THE HABIT

- ☐ Post 3 videos a day, at roughly the same times. Consistency beats perfection.
- ☐ Add your link once you have a few posts up
- ☐ Check which videos get the most watch time and make more like them
- ☐ Turn on the platform's **AI-generated content label** when you post realistic AI content. TikTok and Instagram both have one, and using it keeps your account safe.
- ☐ Keep your AI creator's look and voice the same in every video

Avoid these

- × **Mass following and unfollowing.** It looks like a bot.
- × **Posting the same video on 5 accounts** from the same phone at the same time.
- × **Pushing a product in every single video.** Mix in value and entertainment.
- × **Health or results promises you can't back up.** Keep claims honest and simple.
- × **Deleting and reposting videos** that didn't do well. Learn from them and move on.

The rule: act like a real person who loves this niche. Everything on this checklist comes back to that.

Built your avatar. Now how does it make money?

Amazon pays as little as 1% to 3% in health and beauty. Creator OS members create for our in-house brand and earn 100% commission, only when we work together.

● PROMPT 03 OF 04

The Universal Master Prompt

One prompt that invents your AI beauty influencer from scratch and writes the exact prompt for her first photorealistic selfie. No blanks to fill in. Paste it and go.

1 How to use it

- Copy the prompt on the next page into **ChatGPT, Claude, or Gemini**, exactly as written.
- Send it. It makes every creative decision for you and returns her full concept plus a ready-to-use selfie prompt.
- Save the whole answer in one doc. That's your creator's bible.

2 The tools

IMAGES

Nano Banana Pro 2.1
or ChatGPT's image model

VIDEO

Google Veo Omni 1.1
to bring your creator to life

3 The workflow

- **Generate her selfie.** Paste the selfie prompt it gives you into your image tool. Generate until you love one. That face is now your creator.
- **Lock the look.** Upload that selfie as the reference image every time you create a new photo, so the same woman shows up in every post.
- **Build her world.** Use the reference to put her in new everyday scenes: her bathroom, her kitchen, her car.
- **Bring her to life.** Take your best image into Veo and animate it. Keep clips short, then stitch them together.

COPY EVERYTHING BELOW

You are an AI beauty influencer strategist and photorealistic image-prompt specialist.

Create ONE original female AI beauty influencer, then write a detailed image-generation prompt for her first handheld selfie. Make all creative decisions yourself. Do not ask follow-up questions.

1. Avatar concept

Choose a random age between 30 and 45. This is her only age; her appearance should match it.

Give her:

- Name, age, ethnicity, and location.
- A brief fictional background, personality, and speaking style.
- A specific beauty niche for a U.S. audience.
- Distinctive physical features, hairstyle, and everyday style.
- One social media display name, three username ideas, and a short bio identifying her as an AI beauty creator.

Design her to feel attractive, approachable, credible, and memorable, with strong potential for beauty marketing.

Avoid invented credentials, testimonials, or personal product results.

2. Ready-to-use selfie image prompt

Write one standalone, highly detailed prompt that includes her exact physical characteristics and creates this image:

A vertical 9:16 handheld smartphone selfie, framed from the upper chest to just above her head. She looks directly into the lens with a calm, neutral expression, relaxed face, and closed lips, no smiling. The phone is outside the frame; this is not a mirror selfie.

She wears no visible makeup and has exceptionally clear, luminous glass skin with no visible wrinkles. Preserve realistic human pores, subtle peach fuzz, natural tonal variation, and fine lip texture. Her skin looks hydrated and beautiful, never plastic, waxy, airbrushed, or unnaturally shiny.

Specify her facial proportions, skin tone, eyes, eyebrows, nose, lips, hairline, and individual hair strands. Include slight natural asymmetry and a few flyaways for realism.

Use soft window daylight, realistic eye reflections, simple everyday clothing, and a believable domestic background.

Include subtle handheld framing imperfections, natural smartphone perspective, realistic depth of field, and restrained image processing.

Aim for convincing photographic realism. Avoid beauty filters, studio glamour lighting, exaggerated bokeh, distorted anatomy, text, and watermarks.

Deliver the finished avatar concept and copy-and-paste image prompt. Keep the concept concise and the image prompt specific. Do not generate the image.

What you get back

Her identity

Name, age, background, location, personality, and how she talks.

Her beauty niche

A specific niche for a U.S. audience, so she has a clear lane from day one.

Her profile

Display name, 3 username ideas, and a bio that labels her as an AI creator.

Her first selfie

A detailed, copy-and-paste prompt for a photorealistic 9:16 selfie.

Tips for realistic results

- **Run it again.** Every run creates a new woman. Run it 3 to 5 times and pick your favorite.
- **Keep the reference.** Never start a new image from scratch. Always upload her reference selfie.
- **Check the details.** Look at eyes, teeth, hands, and hairline before you post. That's where AI slips.
- **Messy beats perfect.** Real rooms and real window light look like a real person's phone.
- **Be upfront.** Use the AI label on every post. Her bio already says she's an AI creator.

Built your avatar. Now how does it make money?

Amazon pays as little as 1% to 3% in health and beauty. Creator OS members create for our in-house brand and earn 100% commission, only when we work together.

• FORMATS 04 OF 04

5 Viral Formats That Work

Five formats that are going viral right now. Tap each one to watch it.

1 **Viral Format 1**

Watch the video ↗

2 **Viral Format 2**

Watch the video ↗

3 **Viral Format 3**

Watch the video ↗

4 **Viral Format 4**

Watch the video ↗

5 **Viral Format 5**

Watch the video ↗

How to use them

- **Watch each one closely.** Notice the opening, the pacing, and how fast it gets to the point.
- **Recreate it with your AI creator.** Same structure, your avatar, your niche.
- **Post them on your main account.** These are built for your primary account.
- **They're easy to reuse.** One format can become dozens of videos just by changing the topic.

[• NOW WHAT?](#)

You built the avatar. Now how does it make money?

You have the avatar, the account, and the formats. This is where most people get stuck. An avatar with followers doesn't pay you by itself.

[ON YOUR OWN](#)

Amazon affiliate

1% to 3%

Amazon pays as little as 1% in health and personal care and 3% in beauty. You need huge sales just to make real money.

[CREATOR OS MEMBERS](#)

Our in-house brand

100%

Members create for our in-house brand and earn 100% commission. No product to build, no brand to chase.

The catch: creating for our brand is exclusive. It is only available when we work together.
